# Create Field Dependency (On Candidate Object)

Create a dependency between these two picklists, so that
when a state is selected, only respective Values are available.
The below steps will assist you in creating Field Dependencies.

- Click on the gear icon and then select Setup.
- Click on the object manager tab just beside the home tab.
- After the above steps, Select Candidate Object
- Now Select Fields and relationships from setup menu of the Candidate object.
- Click Field Dependencies.
- Click New.
- Select State as the Controlling Field and select City as the Dependent Field.
- Click Continue.
- Select the appropriate Value in each column by double-clicking them.
- For Ex. Rajasthan - Jaipur
- Click Include Values. And it is also same for UP, MP& Punjab with its city.
- Click Preview, then test the dependency by selecting different State and viewing the associate Values available for Particular state.

- Click Close to close the preview window.
- Click Save.

New Field Dependency

Create a dependent relationship that causes the values in a picklist or multi-select picklist to be dynamically filtered based on the value selected by the user in another field.
• The field that drives filtering is called the "controlling field." Standard and custom checkboxes and picklists with at least one and less than 300 values can be controlling fields.
• The field that has its values filtered is called the "dependent field." Custom picklists and multi-select picklists can be dependent fields.

Step 1. Select a controlling field and a dependent field. Click Continue when finished.

Step 2. On the following page, edit the filter rules that control the values that appear in the dependent field for each value in the controlling field.

Controlling Field State   **1**
Dependent Field   City   **2**

3 Continue Cancel

SETUP > OBJECT MANAGER

Candidate

▼ **Instructions**

• Double click on a cell to toggle its visibility for the Controlling Field value shown in the column heading.
• To change multiple cells at once, select multiple cells and then click the Include Values or Exclude Values button to change the visibility of all selected cells at once.
• Use SHIFT + click to select a range of adjacent cells. Use CTRL + click to select multiple cells that are not adjacent.
• Use the Preview button to test the results.
